Score: 97% · 36/37

Exam completed on: July 10, 2024

Show wrong only Exam questions Show all Question 1 of 37 What does the GROUP BY clause do? Allows you to group two or more databases. Groups SQL tables together. ✓ Allows you to group data. Allows you to group your queries. Question 2 of 37 Which query returns the average household size by ZIP code? SELECT Zip, Round(AVG(HouSiz),1) FROM Housing Course removed 12m ago 1/7

```
SELECT
           HouSiz,
           Round(AVG(HouSiz),1)
          FROM
           Housing
          GROUP BY
           Zip
          SELECT
           Zip,
           Round(AVG(HouSiz),1)
          FROM
           Housing
          GROUP BY
           Zip
          SELECT
           Zip,
           Round(AVG(Zip),1)
          FROM
           Housing
          GROUP BY
           Zip
 Question 3 of 37
 Where does the HAVING clause appear?
        before the GROUP BY clause
        after the ORDER BY clause
